

BHAWANA BISHT

Full Stack Developer

bhawana1205bisht1802@gmail.com | +91-7078807457 | Nainital, Uttarakhand, India | bhanabisht.dev | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Full Stack Developer (React.js, Next.js, Node.js, TypeScript, MongoDB) with production experience across 3 internships building scalable, high-uptime web applications. Shipped AI-powered SaaS platforms and real-time marketplace systems integrating third-party APIs, WebSocket infrastructure, and LLM workflows. Demonstrated ability to reduce deployment time, eliminate UI bugs, and architect systems with 98%+ uptime. Actively seeking a **Software Engineer / Full Stack Developer** role where I can drive product velocity and technical quality at scale.

PROFESSIONAL EXPERIENCE

Summer Atlantic Capital LLC — Full Stack Developer Intern 02/2026 – Present | Hong Kong, China

- Built 14+ reusable React components, boosting design consistency by 20% and cutting per-feature dev time by 30%
- Accelerated feature deployment by 15% through modular architecture and standardized component APIs
- Integrated 5+ REST APIs for core fintech workflows, improving operational efficiency by 18%

upDate Education Technology Pvt Ltd — Web Development Intern 11/2025 – 01/2026 | Raipur, Chhattisgarh, India

- Delivered 4 production feature modules on time across Agile sprints within a 5-engineer team
- Enforced Git branching conventions and PR review standards, cutting merge conflicts by 40%
- Collaborated with QA to implement structured debugging workflows, reducing UI defect rate by 25%

Vislona — Web Developer Intern 09/2025 – 11/2025 | Pune, Maharashtra, India

- Architected a Node.js REST API with 98% uptime, handling 1000+ concurrent production requests
- Cut system error rate by 30% via input validation, error boundaries, and schema-level sanitization
- Boosted API response time by 20% through query optimization, indexing, and Redis caching

EDUCATION

B.Tech in Computer Science (2023-2027), Birla Institute of Applied Science, Bhimtal 2023 – 2027 | Nainital, Uttarakhand
Relevant: DSA, Algorithms, DBMS, OS, Computer Networks

Class XII: 84.6% • Class X: 91.4% — Rajeev Gandhi Navodaya Vidyalaya, Kotabagh 2023 | Nainital, Uttarakhand

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Next.js 15, Tailwind CSS, Material UI, Redux Toolkit, React Query, Vite

Backend: Node.js, Express.js, REST APIs, Socket.IO, WebRTC, JWT Auth, Rate Limiting

Databases: MongoDB, PostgreSQL, MySQL, Firebase, Supabase, Redis, Prisma ORM

AI/APIs: Anthropic API, OpenAI API, Open Router API, HuggingFace, Razorpay, Stripe, Cloudinary, Resend

DevOps / Tools: Git, Docker, Vercel, Render, CI/CD, npm, VS Code, Chrome DevTools

Core Concepts: DSA, System Design, Microservices, Auth Systems, DB Optimization, State Management, Caching

KEY PROJECTS

SkillSphere — Intelligent Hyperlocal Freelance Ecosystem 03/2026 – 04/2026

- (Live: [skillsphere-phi.vercel.app](#)) | Tech:** React, TypeScript, Node.js, Express, MongoDB, Socket.io, Redis, Razorpay, Stripe, Hugging Face
- Architected and shipped a production-grade MERN freelance marketplace from zero — integrating HuggingFace NLP models for real-time skill similarity scoring that automatically ranks and surfaces the highest-matched local freelancers per client requirement
 - Engineered a dual-payment escrow system (Razorpay + Stripe) with milestone-locked fund release, automated freelancer payouts, dispute arbitration flow, and complete transaction audit ledger — handling end-to-end financial trust between parties
 - Built enterprise-grade security infrastructure: JWT + TOTP-based 2FA, Google OAuth, role-based access control (Client / Freelancer / Admin), algorithmic fake-review detection, and real-time Socket.IO collaboration with WebRTC-ready video architecture

StackLens — AI SaaS Spend Audit Platform 04/2026 – 05/2026

- (Live: [stacklens-sooty.vercel.app](#)) | Tech:** Next.js 15 · TypeScript · Supabase · Anthropic API · TailwindCSS · Vercel
- Designed and launched a full-stack AI spend intelligence platform — built a deterministic savings calculation engine that audits AI tooling costs (Cursor, Claude, ChatGPT, Copilot, OpenAI/Anthropic APIs) with rule-based financial logic deliberately separated from LLM outputs to guarantee zero hallucinated results
 - Integrated Anthropic Claude API to auto-generate personalized executive audit summaries with team-size-aware consolidation recommendations — delivering CFO-ready cost optimization reports instantly
 - Shipped privacy-by-design shareable audit reports with Open Graph metadata, zero PII exposure, and production-grade abuse prevention (honeypot fields, IP rate limiting, API throttling) — no CAPTCHA, no friction

LEADERSHIP

Crowdfunding Intern — Researched and executed donor outreach campaigns, driving fundraising awareness and supporting cross-functional campaign operations

IPR Plasma Exhibition Volunteer — Presented scientific demonstrations to 700+ visitors, translating complex plasma physics concepts into accessible public engagement

Sustainability Initiative Lead — Coordinated 50+ volunteers across a campus sustainability project, managing task delegation, timelines, and outcome reporting
